E-services

Use over 800 e-services available on the State service portal Latvija.lv and portals of authorities..

Official e-mail

E-address is a secure communication service – your digital mailbox on portal Latvija.lv. It is a convenient, safe and effective way of contacting over 3000 Latvian authorities – at any time and from any place in the world.

- Send applications.
- Apply for and receive services of authorities.
- Receive messages addressed to you directly from the authorities.
- If you have created an e-address, authorities will further contact you electronically.

To create and use an e-address on the portal Latvija.lv, use any of the electronic identification tools specified.

Secure electronic signature

When you contact authorities electronically, you will need a secure electronic signature, which has the same legal force as a manually signed document.

You can also use your e-signature in your smartphone by using the free mobile app *eParaksts mobile* un *eParakstsLV*.

When can e-solutions be useful

John, 38, is a businessman from the United States, who visits Latvia on a regular basis to conduct business deals. He has spent a lot of time and money registering and managing the company in Latvia and signing various business related documents. A foreigner eID card and an e-address would simplify this process.

Svetlana, 53, a citizen of Ukraine, spends her vacation in Latvia every year. She has bought a summer house here and she is rebuilding it. Svetlana spends part of her vacation in local government authorities, solving different property-related matters. Creation of an e-address and an e-signature would save a lot of time.
